

The blue areas are the front and back cover
 The yellow stripe simulates the spine.
 You can calculate the spine thickness on our website:
<https://www.ipskampprinting.nl/proefschriften/en/calculate-thickness/>
 Make sure you select the correct paper.
 The green part is the bleed. The bleed must be at least 2 mm. The images and color areas must therefore be extended to at least 2 mm outside the format.
 You can use the right hand side for the bookmark. The distance between cover and bookmark is 5 mm.
